SELLER IS
BACK!

PCR-instruments on offer!

29 500 SEK*

Fast heating and cooling

Touch screen and Mobile app

Excellent temperature accuracy and uniformity

Gold Service & Support options

&

On selected 8-well PCR Tube Strips:

- 8-well PCR Tube Strips 0.2 ml with Flat Cap Strips (120)
- 8-well PCR Tube Strips 0.2 ml with single domed caps (120)
- 8-well PCR Tube Strips 0.2 ml with Domed Cap Strips (120)
- 8-well PCR Tube Strips 0.1 ml with single flat caps (120)

35%
discount

Techtum's PCR selection with 25% discount!

GeneExplorer Thermal Cycler (art.no. GE-96G) 96 well microplate, with gradient, CE-IVD

GeneExplorer Thermal Cycler (art.no GE-384G) 384 well microplate, with gradient, CE-IVD

GeneExplorer Thermal Cycler (art.no. GE-96S) 96 well microplate, CE-IVD
with 6 independent temperature zones

*Price 29 500 SEK is for the GE-96G model. reach out to requests price for the additionla models.

NIPPON Genetics EUROPE
INNOVATION FOR YOU

Bambanker & MidoriGreen

Serum-free cryopreservation media for long storage of cells

Perfect in-gel staining or poststaining of DNA/RNA in agarose gels

In our life sciences portfolio the quality and affordability can seamlessly merge, providing reliable solutions without compromising your budget.

FastGene Mini Centrifuge

- Ideal for quick spin down and microfiltration
- Speed: 6000 rpm, centrifugal force up to 2000 x g
- Adapters for single tubes and with three different rotors included.
- Aesthetically pleasing choices that suits all labs!

Midori Green + Free agarose (5 g)

- Perfect in-gel staining or poststaining
- Midori Green Advance / Direct / Xtra
- Get 5 g agarose pack free of charge

Bambanker starter pack (Free FastGene Serological Pipettes Sample)

- Serum-free cryopreservation media for long storage of cells
- Free FastGene serological pipette samples
- Valid for any bambanker product

Easy Flow pipette controller Bundle

- Receive 200 free FastGene® Serological Pipettes (4 bags x 50 pcs each) in the sizes of your choice (1 ml, 2 ml, 5 ml, or 10 ml)
- Experience both EasyFlow and the Serological Pipettes together!

We care about your lab work and success!

From Sample to Success: Save on DNA/RNA Extraction Solutions

Incorporate automation into your workflow and elevate your research to new heights with our comprehensive portfolio of solutions.

GenePure Pro Nucleic Acid Purification System

- High extraction efficiency via magnetic beads technique
- Sample Capacity for single sample or up to 96 samples
- CE-IVD instrument with unmatched repeatability
- Equipped with various anti-contamination measures + self cleaning

Up to 50%! off on our best-selling Macherey-Nagel for RNA, DNA and protein purification

Selected offers (and many more available!)

- NucleoSpin® Gel and PCR Clean-up (740609.250/740611.250) **ONLY 3 804 kr**
- NucleoMag® NGS Clean-up and Size Select (744970.50) **ONLY 5 400,00 kr**
- NucleoSpin® Plant II (740770.250) **ONLY 7 056,00 kr**
- NucleoSpin® Blood (740951.250) **ONLY 6 141,00 kr**
- NucleoSpin® Tissue (740952.250) **ONLY 6 576,00 kr**
- NucleoSpin® RNA (740955.50) **ONLY 2 010,00 kr**

We care about your lab work and success!

Secure Your Samples: Deals on Azenta Cryo Tubes + Capping Solution

AZENTA
LIFE SCIENCES

Preserving and collecting precious samples in a safe and well organized fashion is essential to get the full potential out of them over time.

30%
discount

FluidX® Cryo tubes (1003-11), 1 ml

- Ensure Sample Integrity: top tier class VIII clean room standard
- Improve Sample Tracking: best in class labeling enabling flawless tube auditing
- Automation friendly: taking advantage of industry standards
- No detectable leachables or extractables

Single tube decapper, S1

- Prevents sample loss by minimizing thermal expansion during PCR
- thin wall and low binding polypropylene tubes for optimum PCR results
- Ideal for down scaling of reagent volumes and therefore saves costs
- Easily divided into smaller plate sections, ensuring no tubes are wasted

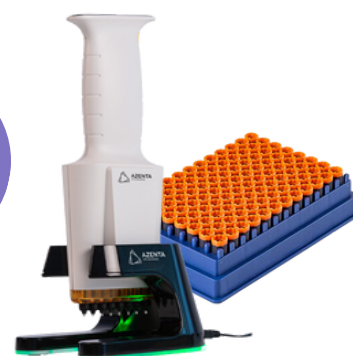

20%
discount

Handheld Tube capper/decapper

- Swiftly decaps a single column in under 4 seconds
- Interchangeable cartridges for multiple tube cap brands
- Ergonomic and lightweight with only 380g
- Automated capper / de-capper offers consistent sealing

15%
discount

We care about your lab work and success!

Black week

Prepare for 2026

Our team of experienced engineers and developers are dedicated to creating innovative solutions that meet the needs of our clients and exceed their expectations.

Pipette Starter 4-pack

- Outstandingly accurate and precise pipetting mechanism
- Built-in user-recalibration allows convenient in-house calibration
- Comfort at work, soft springs and ergonomic grip
- Avoid contamination, fully autoclavable device

25%
discount

Mini centrifuge

- Accommodates up to 8 microcentrifuge tubes or 4 PCR strip tubes
- Comes with adapters for smaller tubes
- Dual lid switch
- Compact, rugged design

20%
discount

Intelli-mixer without rack

- Innovative laboratory devices that enable the mixing of diverse liquid samples in a wide range of test tubes from 0.5 ml up to 50 ml in volume
- 15 Mix Modes
- 12 Rocking Modes
- Blotting Modes

20%
discount

Power Your Workflow: Thermo Shakers + qPCR & NGS Reagents in One Smart Offer

qPCRBIO SyGreen® Mix & SyGreen® Blue Mix

- Market-leading sensitivity – increased limit of detection
- Capable of ultra-fast cycling (down to 2 s denaturation, 2 s annealing/extension)
- Specific amplification from complex templates including GC-rich sequences

qPCRBIO Probe and Probe Blue Mix

- Market leading sensitivity – increased limit of detection
- High efficiency in multiplex reactions
- Efficient amplification from GC and AT-rich sequence

30% discount
on selected
PCRBIIO reagents

UltraScript® cDNA Synthesis Kits

- Thermostable reverse transcriptase 45 °C to 55 °C
- High cDNA yields from as little as 4 pg template RNA
- Accurate reverse transcription of GC-rich templates

VeriFi® Polymerases & Mixes

Derived from Pfu DNA polymerase for its 3'-5' exonuclease (proofreading) activity. The high fidelity enzyme is engineered with proprietary mutations that significantly increase processivity, resulting in shorter extension times (10-30 s/kb), higher yields and the ability to amplify longer and more difficult targets, including eukaryotic genomic templates in excess of 17.5 kb

Thermo-shakers (TS-100, TS-100C, TS-100C Smart)

- Quickly reaches the set mixing speed and maintains same amplitude of rotation around the block;
- Stable maintenance of the temperature of a wide range over the entire surface of the block;
- LCD display shows the set and actual temperature, speed and time;
- Quiet engine operation, compact size, long service life.
