Gradient PCR cycler selection with 25% discount!

- GeneExplorer Thermal Cycler 2 x 48 well microplate, with gradient, CE-IVD
- GeneExplorer Thermal Cycler 96 well microplate, with gradient, CE-IVD
- GeneExplorer Thermal Cycler 384 well microplate, with gradient, CE-IVD

*Price 31 500 SEK is for the GE-96G model. reach out to requets price for the additionla models.

Centrifuges & Liquid Handling

30%
OFF

In our life sciences portfolio the quality and affordability can seamlessly merge, providing reliable solutions without compromising your budget.

FastGene Mini Centrifuge

- Ideal for quick spin down and microfiltration
- Speed: 6000 rpm, centrifugal force up to 2000 x g
- Adapters for single tubes and with three different rotors included.
- Aesthetically pleasing choices that suits all labs!

FastGene Plate Centrifuge

- Centrifuge for 96- and 384-well plates; 2 x SBS format plates
 - 2 adapter for 96-well plates (0,2 mL)
 - 2 adapter for 12 x 8-well strips (0,2 mL)
- Speed: 2200 rpm (480 x g)
- With timer function

Easy Flow pipette controller Bundle

- Receive 100 free FastGene® Serological Pipettes; 1 ml, 2 ml, 5 ml, or 10 ml.
- Experience both EasyFlow and the Serological Pipettes together!

We care about your lab work and success!

Secure Your Samples!

Deals on Azenta Cryo Tubes + Capping Solution

AZENTA
LIFE SCIENCES

Preserving and collecting precious samples in a safe and well organized fashion is essential to get the full potential out of them over time.

FluidX® Cryo tubes (68-1003-11), 1 ml

- Ensure Sample Integrity: top tier class VIII clean room standard
- Improve Sample Tracking: best in class labeling enabling flawless tube auditing
- Automation friendly: taking advantage of industry standards
- No detectable leachables or extractables

35%
discount

Single tube decapper, S1

- Reduces risk of repetitive strain injuries
- Reduces sample handling time
- Broad compatibility; 50 ml, 15ml, 2ml and many more..
- Easy to use, one-handed operation

20%
discount

Handheld Tube capper/decapper

- Swiftly decaps a single column, 96-format and new 48-format
- Interchangeable cartridges for multiple tube cap brands
- Ergonomic and lightweight with only 380g
- Automated capper / de-capper offers consistent sealing

15%
discount

Limited-time Offers

Prepare for 2026

Our team of experienced engineers and developers are dedicated to creating innovative solutions that meet the needs of our clients and exceed their expectations.

Pipette Starter 4-pack

- Outstandingly accurate and precise pipetting mechanism
- Comfort at work, soft springs and ergonomic grip
- Avoid contamination, fully autoclavable device
- 4 single channel pipettes incl. 10, 20, 200, 1000 μ L
-

Intelli-mixer without rack

- Innovative laboratory devices that enable the mixing of diverse liquid samples in a wide range of test tubes from 0.5 ml up to 50 ml in volume
- 15 Mix Modes
- 12 Rocking Modes
- Blotting Modes

We care about your lab work and success!

Power Your Workflow:

Start-to-End Solutions for Every Lab...

Photometer (DEN-600)

Common applications include:

- Cell concentration measurement
- Cell growth data estimation
- Log phase estimation for microbial cells induction
- Competent cell preparation
- Bradford protein assay method
- Antibiotic susceptibility testing
- Inhibitory tests

40% discount
on Best Sellers!

Now only
9 450 SEK

Mini-shakers (PSU-2T)

- Adjustable mixing of reagents in microplates; 150–1,200 rpm
- Orbit on platform is 2 mm
- The digital LCD display shows the set speed and time; 1 min–24 hrs / non-stop
- Quiet engine operation, compact size, long service life.

Now only
6 850 SEK

Thermo-shakers (TS-100 Smart)

- Quickly reaches the set mixing speed and maintains same amplitude of rotation around the block;
- Stable maintenance of the temperature of a wide range over the entire surface of the block;
- LCD display shows the set and actual temperature, speed and time;
- Quiet engine operation, compact size, long service life.

Now only
