Bench to AH diagnostics promotion 2026

NucleoSpin® 96 Plasmid TG Plus

- Transfection-grade plasmid purification in a 96-well plate format
- Next generation binding plate with up to 60 µg binding capacity
- Ultra low endotoxin levels for optimal transfection performance

NucleoMag® Plasmid

- Automatable transfection-grade plasmid purification with magnetic beads
- Efficient automated processing reduces hands-on time
- High quality plasmid DNA for sequencing, cloning or transfection

NucleoBond® RS columns

- Plasmid purification compliant with high regulatory standards
- Scalable for up to 200 mg vaccine-grade plasmid DNA
- Endotoxin levels ≤ 0.01 EU/µg DNA
